

FACT SHEET

FACTS ABOUT COMPLEX REHAB TECHNOLOGY (CRT)

BUDGET DUST

What you don't see CAN hurt you.

Budget Dust is a small and/or inconsequential amount of money, often what remains after a larger budgeted amount is spent

CRT spending is about .06% and is not enough to show up in a pie chart.

PRESSURE INJURIES

\$500 - \$1600

Cost of pressure reduction cushion/seating

\$7,500 - \$25,000

Cost of powered seating that provides effective weight shift for user

\$100,000 - \$175,000

Cost of treating one person with a pressure injury

THE RISKS OF PRESSURE INJURY

A prolonged course of treatment is required for pressure injuries to heal.

While healing I may miss:

- work
- school
- medical appointments
- family life
- community activities

CONGRESS MUST ACT NOW

CRT systems are individually configured to the user.

We want to protect access to equipment for all CRT Users.

- 50% reduction in skin issues
- Improvement of physical health and well-being
- Disease progression may slow
- Ability to connect with others through work, education, recreational, and leisure activities allows for a healthy, happy lifestyle!
