Discussion Paper on Complex Rehab Separate Benefit

In the event that you missed or were unable to attend the latest webinar on the Complex Rehab Separate Benefit work being done, we are sharing the discussion paper, which has been developed by the Steering Committee. There are 2 very important things to keep in mind as you review the document:

- 1) These are NOT changes that are being implemented by CMS or any other agency at this time. The Discussion Paper only contains information that POTENTIALLY would be shared with CMS and its contractors regarding changes that may be required as part of implementing a new benefit category. There is no guarantee that CMS will accept our proposals in part or in total. However, whatever proposals we would put forward should be carefully vetted and considered from the perspective of all stakeholders.
- 2) The Discussion Paper is designed to provide a basis to have meaningful discussion with stakeholders. We made every attempt to consider changes that would provide relief, stabilize the industry, protect access and resolve the primary challenges that exist today. We are seeking stakeholder feedback, questions and concerns.

Please take the time to carefully review the information being provided. This is an extremely important and complex initiative and the more input we have the better positioned we are to consider potential outcomes and to develop strong proposals to CMS. Your feedback is important. Feel free to contact me, Simon Margolis at smargolis@nrrts.org or at the office, 763-494-6774.
